

Name: \_\_\_\_\_

Date: \_\_\_\_\_

1. Read the paragraph below.

Ayşenur is 13 years old and she uses the internet every day. She watches educational videos on science channels, chats with her classmates on a messaging app, and reads book reviews on a blog. However, she never shares her personal information online because her parents taught her about internet safety.

According to the paragraph, which of the following is **NOT** something Ayşenur does on the internet?

- A) She watches videos about science topics.
- B) She reads reviews about books on a blog.
- C) She shares her personal details on social media.
- D) She communicates with her classmates through an app.

2. Read the survey results below.

 **Survey: What do you use the internet for most?**

(200 students, ages 12–14)

Activity	Percentage
Watching videos	35%
Playing online games	25%
Doing homework / research	20%
Using social media	15%
Online shopping	5%

According to the survey, which of the following is correct?

- A) Most students use the internet mainly for online shopping.
- B) Playing online games is more popular than doing homework.
- C) Using social media is the most common internet activity.
- D) Fewer students watch videos than play online games.

3. Read the four students' statements about their internet habits.

**Rüzgar:** I spend about four hours a day online. I know it's too much, but I can't stop scrolling through videos.

**Defne:** I only go online when I need to search for information for school projects.

**Koray:** I use the internet to follow the news and learn about current events around the world.

**Sude:** I download music and listen to podcasts. I never watch videos because they waste my time.

Who thinks they spend too much time on the internet?

- A) Defne
- B) Koray
- C) Sude
- D) Rüzgar

4. Read the online safety tips below.

 **Stay Safe Online — 5 Golden Rules**

1. Never share your password with anyone, not even your best friend.
2. Do not click on links from people you don't know.
3. Always log out of your accounts on shared computers.
4. Tell a parent or teacher if someone online makes you feel uncomfortable.
5. Use a strong password that includes letters, numbers and symbols.

According to the tips above, which of the following is **NOT** a recommended online safety practice?

- |  |  |
|--|--|
| <b>A)</b> Logging out of accounts on public or shared devices.     | <b>B)</b> Sharing your password with a trusted friend for emergencies. |
| <b>C)</b> Reporting uncomfortable online interactions to an adult. | <b>D)</b> Creating a strong password with mixed characters.            |

5. Read the dialogue below.

**Kerem:** Have you seen the new gaming website? It asks you to enter your home address before you can play.

**Berra:** That sounds suspicious! You shouldn't give your address to unknown websites.

**Kerem:** But I really want to try the game.

**Berra:** \_\_\_\_\_

**Kerem:** You're right. I'll ask my dad about it first.

Which of the following best completes the blank?

- |   |   |
|---|---|
| <b>A)</b> Go ahead and enter your address — it's probably safe. | <b>B)</b> It doesn't matter. All websites ask for that information.   |
| <b>C)</b> Just give a fake address. Nobody checks anyway.       | <b>D)</b> It's not worth the risk. Protect your personal information. |
